***Observation / suggestions from students to improve the overall teaching – learning experience.***

**Observation / suggestions from students to improve the overall teaching – learning experience.**

|  |
|--|
| <b>Give three observation / suggestions to improve the overall teaching – learning experience in your institution.</b>   |
| 1) No.of Assignments must be reduced<br>2) Assignment Test must not be held<br>3) Preliminary Exam marks not to be considered for Term Work  |
| practical applications of the concepts should be taught by the teachers  |
| Overall everything is good   |
| None   |
| They are at their best..!!   |
| Overall good   |
| More interactive classes   |
| Pls reduce assignments<br>And pls don't give assignments at the time of IA tests   |
| pretty good overall.   |
| 1. Should be loud<br>2. Not an entertainment class<br>3. Should give more live examples to understand  |
| our institute can help us get involved in extra curricular and sports  |
| None   |
| Semesters are meant to be for 6 months, and those are already stressful enough for many students. Now when a semester is of 3 months and the portion of 6 months what output does the University expect of these students.<br>Just would like to elaborate on the above point, our lives are in jeopardy because of this, can't have a healthy lifestyle because of the time crunch<br>The university has enough and the necessary stats to backup the point on how it affects the grades of many students as well.<br>Humble request to look into this matter |
| Spacing out lectures, practicals to keep enough time for submitting assignments, projects, to study for exams  |
| Teachers should be motivational.<br>And should keep students active by using creative teaching methods like games.<br>They teach quite nicely, highly agree, but they should do frequent revision, give assignments so that students can study well.   |
| Slower pace, interacting with students and not rushing through portion   |
| 1. traditional teaching should be followed<br>2. Mike system must be used by every teacher<br>3. Management can be better  |
| Staff with good qualifications, Need to add air conditioner to laboratory, Need to add charging ports near desk<br>So that comfortable to use laptops in classroom while working for projects  |

|   |
|---|
| 1) Allow students to give more emphasis on events other than the college events<br>2) Leave students at the exactly at the time when the lecture ends<br>3) Sometimes, allow students to explain their Point of View before judging the action/issues of the student  |
| Should involve practical learning and field visit<br>Must arrange inter branch competitions regarding their respective subjects   |
| - Extra - curricular/cultural activities<br>- giving less assignments towards the end of the semester (assignments which were supposed to be given in the beginning)  |
| Giving time to learn  |
| Boring subjects like Microprocessors must be taught suitably so people won't be bored by it<br>(Although that's a subject issue so no idea how it can be improvised)<br>Homework given should be little lesser and deadlines should be more time<br>More encouragement for extra courses can be given                       |
| None  |
| 1)The rigid structure of teaching many a times fail to identify weak students doubts.I refer to sticking to syllabus and at times rushing to finish portion by rigidness.<br>2)The students should be allowed to join the lecture at any time at least.<br>3)The overall exam schedule helps studying for the end semesters |
| Nothing much ...it's great  |
| More competitive program within class   |
| No, overall it's good   |
| Teachers should try a way were student will feel that the subject is easy and interesting just like the youtubers. They should not always go in a formal way sometimes they should think like a student and should not go on teaching for complete 1 hour.  |
| Nothing   |
| Keep transparency in attendance records,focus more on practical and theory little less apt for the practical and help children in their practicals and mini projects  |
| Good  |
| 1. Be lineant with the attendance<br>2. Reduce the assignment and writing work<br>3. Incorporate deep thinking and learning   |
| Nothing,Every thing is excellent  |
| Need to explain some topics by giving real life examples.   |
| Practicality in the teaching  |
| Syllabus must be related to current market trends   |
| Getting no time for self-study.   |
| •Alot of assignments/writeups are given to be completed at home which takes our most of the time and there is no self study time left.<br>•some teachers are less bothered about how we study.<br>• After tests they don't tell where to improve  |
| .   |

|  |
|--|
| <p>some teachers are very short tempered and not ready to listen to the student for their queries and are more concerned about their names being pronounced and written correctly<br/>some teachers barely teach anything during practical secessions and are just irritated on students for no reason<br/>50% of the teachers are good the rest need to improve in how they interact with students and how they teach us because they barely have knowledge on what they teach and YouTube teaches better than these teachers</p> |
| More interactive approach towards presenting   |
| Teachers could improve in teaching the concepts in practical. Sometimes teachers rush into finishing the syllabus, which becomes difficult for average students to cope. Few teachers teaching is not effective and not clear. Getting difficult for DSE students to cope. Few topics are not yet taught to them.  |
| Include subjects only relevant to the job opportunities related to the course.<br>Revise the weekly schedule so that at least half of the weekly working days end earlier as compared to 4:30PM.<br>Eradicating the need to write practical writeups as almost nobody benefits from the lab experiments in Chemistry and Physics for example as it unnecessarily wastes time and burdens the student.  |
| More exposure to practical learning<br>More effective Industrial visits<br>Making use of laptops for practical purposes  |
| Extra time for internships and extra courses<br>Unnecessary study burden and exams<br>Long time schedule for college   |
| By solving numericals on board instead of ppt. Giving time to prepare for tests/exams. Giving portion of IA and AT beforehand.   |
| Would be great if assignments are little research based or problem statement based instead of QA format.   |
| Nope.  |
| Very less extra curricular activities  |
| less theoretical approach and more practical approach  |
| Overall experience is good   |
| More realistic practical life learning approaches in teaching required   |
| Good college   |
| Good college   |
| 1) add more examples<br>2) more numericals solved in class<br>3) Short background of each topic  |
| -The institute should focus on making student learning stuff that will make student employed and skilled.<br>-Recording of Lectures, would be good for students , if they miss a lec or any other reason.<br>-Theory of Syllabus should be reduced and more focuss should be on application of the theory and many more.   |
| No suggestions   |
| N.A  |
| Improve Teaching Interaction with student  |
| Less written assignments<br>More practicals  |

|  |
|--|
| * More practical examples<br>* Less stifling schedule<br>* provision of question banks   |
| None   |
| No improvement needed  |
| More time for extracurricular activities.<br>Internship opportunities.   |
| Can be improved  |
| No   |
| Could be more interactive<br>Flip class and industrial visit could be given more importance<br>Fun activities could be conducted   |
| No suggestions   |
| Active learning strategies can make the learning experience more engaging and effective while promoting critical thinking and collaboration skills.  |
| None   |
| Very nice  |
| K  |
| Extend the lunch break by half an hour.<br>Encouraging the students to participate more in intercollegiate fests and competitions.<br>Conduct more hands on workshops.   |
| Good   |
| great  |
| 1) Please keep interval between exams<br>2) Please promote internship opportunities and give time for it in timetable<br>3) Please provide sufficient break time in lecture  |
| a) Keep some gap between AT exam and IA exam so that students can analyse their shortcomings through checked AT papers.<br>b) Please promote internship opportunities for all the students so as to get an exposure to the IT field .<br>c) Give at least one day holiday between each IA exam since we need to study two subjects for the same day. |
| Flip class can be given more interactive<br>Projects can be guided more<br>Everything was perfect  |
| More attention could be given on whether the students apply what is being taught to them in class.   |
| Teaching process is quite good just need to focus on how a specific student needs to get improved if needed by focusing on him/her   |
| In 2nd semester I'm not able to understand the subject like graphic, theory part of C Programming and PCE  |
| Nothing as such.   |
| Encouraging off campus placement<br>Lessen college hours for more self study time  |
| 1 Reduce the number of examination.<br>2 Some days of gap between any two examination.<br>3 No more suggestions.   |
| Please give less assignments   |

|  |
|--|
| Don't give homework everyday   |
| Reduce assignments , and AT .<br>We need more Coding events . Hackathons, offline Hackathon  |
| 1) Student teaching programmes(flipped classrooms) could be more frequent<br>2) The size of a classroom (60-70) students is one main reason for a student to not be attentive in classroom<br>3) Teachers can be tested(with an exam for example) to ensure they are fit to teach a subject with enough accurate knowledge |
| Don't take assembly.   |
| The teachers should keep proper gaps while preparing the schedule of tests as the assignment tests and internal assessment tests barely have a gap of a day or two. There is hardly any time left to evaluate the paper and our mistakes of assignment test which hence get repeated in internal assessment tests.         |
| Teaching is good , I don't have any suggestions  |
| High frequency of lectures   |
| A little more time in between exams would be appreciated since feedback on scores are vital for improvement.   |
| Assignments,test, projects and write ups should be balanced.We students are under a lot stress due to overload of work!<br>We don't get time for self study.   |
| I think "professional communication and ethics"(sem 2 subject) should have either practical session or normal lecture both are not necessary,that will save our college hours .I hope you will give this a thought   |
| its all and good   |
| 1. More time for practicals rather than theory<br>2. More IV Visits<br>3. Less dependency on ppt for teaching.   |
| 1. Reduce college time.<br>2. elminate assembly.<br>3.give less focus on Marks.  |
| Reduce Lecture times and increase practicals   |
| Content should be presented in such a way that students remain hooked.   |
| Display content which students can relate to   |
| Good teaching  |
| So many exams  |
| More teaching in lab<br>Less assignments   |
| No suggestions   |
| There is no field visit ...  |
| Less assignments<br>More interactive<br>Better presentations?  |
| Industrial visit should be at a better place.  |
| Coding culture should be set up in college and it'll improve the skill set of students   |

|  |
|--|
| Internship<br>Focus more on technical  |
| so far a very good experience in the institute.  |
| Need better methodologies to enhance learning experience.<br>More internship opportunities need to be given.   |
| Suggestions-<br>1) More practical experiences<br>2) More internship opportunities  |
| The elective which the student wants to take should be provided irrespective of how many students opt for it.  |
| Reduce strictness  |
| 1) Learning should be more interactive.<br>2) College hours can be reduced.<br>3) Stress relieving activities can be enhanced.   |
| no suggestion  |
| 1. Unnecessary Assignments should be avoided... emphasis should be placed more on understanding of concept rather than retention in memory.<br>2. Late remarks, Assembly are simply a waste of time... they don't help with anything but more disdain towards attending the college.<br>3. Timing of the lectures could be adjusted more   |
| Full marks should be given what is university says not to give full marks? The paper is of 80 marks not 65 or 70 where teachers would reduce 1 mark in each question as they can't give full marks.<br><br>After performing lab practical, students are kept waiting while the time gets over..if the practical is over, there is no point in sitting lab.<br><br>Electives should be there even if the percentage chosen is 40 percent or not..because it's our choice ...our wish..our interest. |
| 1-explaining with multiple examples<br>2-clarity of topic in ppt<br>3-interactive session  |
| Learning at this institute is a privilege.   |
| Incorporating a better environment with AC   |
| Teaching and doubts solving are pretty good and it helps a lot in understanding subject.<br>But college institute should provide more time to student for his/her technical development, coding and self-improvement.  |
| College environment should be less stressed<br>Everyone is always stressed with the never ending exams which clg conducts for extra<br>Due to such stress not able to focus on other circular activities   |
| More practical experience than theoretical knowledge and more internship opportunities   |
| Education is good. But there are too many exams for students to even pay attention to growth of other skills other than academics. This is causing burnout among students.   |
| To many exams are conducted because of that student don't get time to learn new skills.  |
| Overall teaching is excellent. Faculty is good . Helping .   |

|   |
|---|
| Time gap between AT and IA to study for IA.<br>NA<br>NA   |
| Nothing   |
| 1. teachers should use student centric methods<br>2. institute should take active interest in promoting internship, student exchange, field visit opportunities for students.   |
| students should not be kept waiting in the college just for attendance even when they have completed their work on or before time. Evaluation should be done according to university guidelines only.   |
| Teachers should evaluate the practical done and give the marks accordingly to all, everyone should be marked fairly   |
| No partiality in giving marks   |
| Good, Informative, Creative   |
| Everything is good<br>No suggestions  |
| Satisfactory  |
| Nothing   |
| Taking interest in extracurriculars<br>Taking interest in making syllabus more practical orientated<br>Taking interest to see that the student is doing well in overall academics   |
| Flexible time periods for preparing for Internal Assessment tests   |
| Inculcate more on field knowledge or experience to make students more involved in the subjects  |
| Some teacher are good others just satisfactory  |
| It's good   |
| 1) Overly strict could improve alot on it.<br>2) Continuous submission process and tests feels like there is no breathing period at times.<br>3) Could Imporve Facilities for Mini Project or let students go home and do their project where they have the correct facilities and environment. |
| More numericals and easy explanation  |
| Outdoor activities should be included   |
| Making concept more visualising<br>More examples  |
| Teach more of practical based content than theory.<br>Writing theoretical assignments aren't of much use for overall progress.  |
| More information about softwares used in industry.<br>The usual workflow done in industry.<br>More encouraging in intership.<br>Less assignment and more practical knowledge.   |
| Learning experience is nice<br>Got interested in studies  |
| Conducting tests are not enough, but giving us time to prepare for it is also necessary.  |
| nice  |
| None  |
| It's excellent  |

|  |
|--|
| Unnecessary strictness should not be termed as discipline.<br>Teachers are wonderful.<br>There should be a proper understanding of the physical health of the student to the Institution as our schedules tend to be very tight and we barely get time to sleep.   |
| All good   |
| More Internship opportunities<br>Student exchange opportunity could be provided<br>More Industrial visits could be provided  |
| Should focus on other activities other than academics  |
| less of assignment tests and prelims   |
| To communicate with other departments and give submissions for students accordingly so as to not overload the work assigned  |
| Can make the lectures more interactive in 40 - 45 minutes and give rest for atleast 10-12 minutes before the commencement of the new lecture.  |
| No suggestions   |
| Reduce the college timing by an hour.....  |
| 1. Interactive sessions<br>2. Less use of ppt<br>3. Considering lectures as guidance for students rather than teaching sessions and planning the session accordingly   |
| - Focus more on practicals than theory<br>- Encourage students to participate in competitions and hackathons<br>- Give importance to skills than to marks  |
| Everything is good!  |
| 1 college hours need to be reduced so that students can learn other stuff such as web development.<br>2 senior junior relationship need to be improved so that junior can learn from senior's experience.<br>3 guiding seminars needs to be given frequently also should be taught recently technologies |
| No suggestions   |
| It is good   |
| Personalized learning can improve the teaching-learning experience by catering to individual learning styles and paces.  |
| Nothing  |
| good   |
| A lot of portion was rushed and we were given less time to prepare .<br>Otherwise excellent teaching quality.  |
| Lot of portion was rushed<br>Little for preperation<br>Rest overall was good   |
| 1.The faculty needs to interact more with students.<br>2.The institution should focus on practical knowledge rather than just teaching theory.<br>3. The institution should do a regular follow up session between the students and the mentor.  |
|  |
| Please try to complete syllabus on time and kindly hire highly professional faculties and do web dev programs during FE  |

|  |
|--|
| <p>1. No of sums given as hw in maths should be reduced and more no of sums should be solved in class by the teacher.</p> <p>2. Attention should be given to weak students even before the exams start instead of assigning impositions after scoring less in exams.</p> <p>3. Not rushing through the syllabus but rather giving more time towards learning SOMETHING rather than just completing the entire syllabus without having understood anything.</p> |
| <p>A little acceptance in individuality would be appreciated.</p>  |
| <p>1.teaching learning be improved</p> <p>2.there should be more extracurricular activity</p> <p>3.assignment load should be reduce because of which we don't get time to study and perform well</p>   |
| <p>1. More encouragement towards competitive coding</p> <p>2. More encouragement for competitions</p>  |
| <p>Use of compact ppts</p>   |
| <p>More practical knowledge required</p>   |
| <p>excellent</p>   |
| <p>Good</p>  |
| <p>"Everything was perfect, every last minute detail..... Everything "</p>   |
| <p>Teaching Learning process is good , Although teachers should not always burden the students with lots of assignments, tests and homeworks.</p>  |
| <p>Professors with better teaching and communication skills need to be appointed.</p>  |
| <p>Would be better if there were more pratical lecture of c programming rather than theory lecture since actually going to the labs and writing the actual codes help a lot in understanding the logic of C</p>  |
| <p>More ice breaking and informative seminars for 1st year students about the various fields we can dive into would be nice.</p>   |
| <p>Good</p>  |
| <p>1.Teachers should encourage other co-curricular tivities like participating in OC , events and all</p> <p>2.They should complete syllabus slowly....their only aim is to complete syllabus and dont care whether we understood or not</p> <p>3.One day study leave before IA will help u a lot ( *Main Point*)</p>  |
| <p>Innovative learning method is good along with it we can have a application model of its implementation if possible on software skills if compatable topic is there and more encourage to students to do sports and hybrid schedule in atleast first 2 weeks of starting of college so that if any internship need the student on campus and fulfill the correspondence</p>  |
| <p>Proper breaks is expected to study</p>  |
| <p>-</p>   |
| <p>Better communication would help students plan ahead.</p>  |
| <p>1. Teaching should be interesting from teacher's side rather than just reading from ppt</p> <p>2. Paper's evaluation should be fair .It should not be like for example he or she is CR of class then full marks irrespective of things they have made mistakes in</p> <p>3. Some teachers don't even take writeup for signing even if we have submitted on time</p>   |
| <p>Can be slow in teaching and little interactive with students</p>  |
| <p>Try to be a little considerate about grasping power of students</p>   |
| <p>The assignments assigned each week is increasing and there is no time for self study.<br/>Better teachers should be appointed.</p>  |

|   |
|---|
| Enough time is not given to learn... Only rushing through syllabus wont help in learning.. Overall teaching quality is good   |
| 1. Help the student in rectifying his mistakes effectively<br>2. Plan the assignment / internal tests effectively so that it doesn't burden the student during the time of examination  |
| More interactive lectures.<br>Teachers are highly qualified but should not be restricted by time.<br>Try to keep lecs interesting and understand that lecs are getting boring when students run outside to wash their face as soon as the lec ends  |
| By giving the students a bit more time for self studying to grasp the concept clearly   |
| Industry specific topics<br>encouraging self-learning<br>more group projects  |
| 1. Good Teaching<br>2. Good practical sessions<br>3. Good faculty   |
| A lot of emphasis on how to write answers in the exams and marks. Instead would like to learn more practically  |
| Teach then quiz   |
| More practical based, Include other activities like picnic, improve student teacher bond  |
| None  |
| More interactive lectures.  |
| More practical based learning   |
| AT's, IA's, Prelims, Presentations, this and that are literally one after the other that sometimes you are just giving exams without properly sitting and preparing for exams and just on basis of what you hear during lecture. If we got little more time to prepare for important exams and then give exams other than rushing, it would have significant improvement in grades. |
| No suggestion needed  |
| More laptop in classes  |
| Good  |
| Add more application based approach<br>Avoid writing writeups for assignments and practicals<br>Give some more time for internships like other big institutes   |
| Teachers have multiple times stated they are learning the subject with us while teaching us.<br>Have more experience over the subject they are teaching.<br>The teachers are quite Orthodox and outdated with their viewpoints in comparision to our current life.  |
| Reduced load on exams or assignments  |
| Getting more industry oriented, conducting more activities related to entrepreneurship, encouraging longer period of internships in MNCs and student exchange programs.   |
| The teaching experience is overall good and i have no suggestions in the matter   |
| Mostly any kind of assignment submission should be taken care but due to hectic secluded college life makes it difficult so if reminder is possible then it would be helpful  |
| Its satisfactory in every level   |
| Overall Good  |
| Overall good  |
| Good  |

|  |
|--|
| Some teachers do not mind at all where students are listening or not that should be changed.   |
| Reduce homeworks<br>Focussing on practical learning<br>Introducing extracircular subjects based on branch must be included from 1st year                                       |
| Reduce hw<br>Reduce college hours<br>Promotion of extracurricular activities   |
| Too many assign works<br>Rest is good  |
| to give less homework<br>to give less assignments<br>to reduce college hours   |
| lot of mindless writing required which cuts into study time, reduce if possible  |
| overall Good   |
| All good   |
| The teachers are taking the classes too fast.<br>They need to see if the student is understanding or not and not just try to finish the portion                                |
| More visual use like ppt<br>More activities while teaching<br>More use of examples   |
| College timing   |
| Good   |
| Better ways to teach the students  |
| Teacher should build good relation with their students so that students can easily share their issues with them  |
| 1) Classes should not extend till after 3:30 p.m. .<br>2) Quality of projector should be improved.<br>3) No lengthy write-ups should be given.                                 |
| Timetable should limit till 3:30 every day instead of 4: 30  |
| More practical bassed teaching than to keep writing writeups.  |
| Opportunity to the field visit and curriculum activities   |
| The teaching is perfect so I have no suggestions to give.  |
| Grading system can be improved<br>Number of assignments can be reduced<br>Overall it's a wonderful college   |
| The teachers already teach very good no suggestions from my side   |
| No Prelims<br>No AT<br>No re Prelims   |
| 1.Should concentrate more on application based learning.<br>2.Writing work must be minimized in at least computer department.<br>3.Should bring more internship opportunities. |
| It would help by providing more flip classrooms  |
| Provide more preparation time,<br>Provide more buffer period.  |
| Promoting internship and sharing oppportunities frequently rather at last moment<br>It is better if core subjects teachers has more than more experience.                      |
| Preparation was well by teachers   |

|   |
|---|
| No suggestions  |
| More focus on practical approaches of the topic   |
| nothing   |
| 1. Practical sessions can be more application orientated.<br>2. More research opportunities can be provided to students by connecting with appropriate teachers.<br>3. Syllabus can be updated according to technologies used in industry.  |
| Labs session needed to be improved. Giving problems to students and just telling them to solve is not the right way as all the students are not at the same level in terms of knowledge. Some will be able to do of their own and then other who don't understand how to solve then they have to copy and submit the practical  |
| Focus on the implementation first rather than the documentation, publishing papers and writing reports just for the sake of doing so is rather counterproductive.   |
| Don't make everything about marks!! Teach real stuff , industry work then focus on assignment tests prelims etc. There are some teachers which show hostility towards some students, Please be kind with students and make college a place we want to come rather than just for attendance , there is no need to show a negative attitude and scold college kids. Invest more on college festivals from the future the events compared to other colleges feel terrible. There are some really good teachers as well but they are very rare. |
| Bigger classroom, self learning time, study material  |
| 1) more interaction with students<br>2) teaching practicals<br>3) interactive sessions  |
| Time to study for exams   |
| Everything is great<br>Air conditioners required in computer labs   |
| Makes each student understand, Great teacher-student understanding, Feel valued   |
| No improve good   |
| The overall teaching atmosphere is good   |
| Good<br>Great<br>Excellent  |
| Very nice   |
| Involve more innovative techniques, improve submission process, involve more extra curricular activities  |
| 1. Spaced examinations<br>2. Use of more practical examples<br>3. Better lab facilities   |
| Better lab facilities<br>Better presentations<br>Ac facilities  |
| should interact more  |
| Too much exams and assessments on frequent basis do not allow to involve in other co-curricular and extra curricular activities.<br>Overall teaching and learning experience is moderate.   |
| More time to study  |

|   |
|---|
| okay teaching<br>good prelims<br>nice environment   |
| More interactive than PPT   |
| Good  |
| Nothing   |
| Good  |
| Mic should be used by teachers because voice is not clear at last benches of class  |
| All Teachers Are Good   |
| Teaching speed must little slow   |
| They can explain in a simple way which students can able to understand.   |
| Overall teaching is good.<br>There is no as such any suggestions that I would like to give  |
| 1.In the college curricular please add the<br>physical fitness programs.<br>2.Give us 5 minutes break after the lectures.   |
| No ppt<br>Give notes<br>Breaks  |
| Ok  |
| Some activities should be conducted   |
| Teacher's should act like teachers and not robots who have some data in them and have to express that data like a robot.<br>Institute should encourage students for extracurricular activities.<br>Institute should make sure that the communication skills classes are well designed, it is a very important subject.<br>Father Agnel has failed in providing quality teaching when it comes to communication skills classes.<br>Rest all subjects are good.<br>Please make sure that you don't kill curiosity of students which is currently happening because of inferiority complex students are hiding their curiosity and killing their creative side. Creativity is must for an engineer and the college should focus on creativity enhancement of students. |
| The first main thing I want is a proper guidance for internship. Internships opportunities should be provided   |
| Student interaction   |
| Prelims should be organised   |
| Weekly test should be conducted for every subject .<br>Homework question should be discussed in class .<br>Sample question paper should be discussed in a class before exams.   |
| Nothing   |
| Teachers can speak English and Hindi language. It be cleared then I will no excuses. Thank you for giving feedback.   |
| Good  |
| The computer lab staff is quite rude<br>The cash counter isnt very cooperative (usually needed for xeroxes &submissions)<br>The one hour lectures are quite boring at times could be shorter &not repeatative for same lecture<br>Also there should be a 10 mins break between 2nd &third period for coffee   |
| More practical learning needed.   |

|  |
|--|
| <p>The teachers should try to teach the students to be engineers and focus more on the teaching of concepts rather than teaching for just achieving marks.<br/>Written work should be reduced wherever possible.</p>   |
| <p>Need gaps between exams to prepare .<br/>PPT and stuffs are ok but sometimes difficult to understand .<br/>Short breaks are necessary as it is not possible to concentrate for a longer time duration .</p>   |
| <p>Overall-Good</p>  |
| <p>I feel like more manual ways of teaching is more effective</p>  |
| <p>Should be more practical in subjects like PCE .</p>   |
| <p>Arrange Proper benches</p>  |
| <p>The experience has been till date. Hope to do well here</p>   |
| <p>1) Need a bit more gap between tests and exams.</p>   |
| <p>reduce the restrictions on students</p>   |
| <p>1.Telling us important questions which are very important for exams and explaining them in detail.</p>  |
| <p>Plzz reduce clg hours</p>   |
| <p>Teaching should be related with day to day examples as it will help in remembering the situation easily</p>   |
| <p>To teach more industrial oriented, give more examples and make lectures interesting</p>   |
| <p>Slide uplodation on time<br/>Try to complete the portion for IA and AT week prior</p>   |
| <p>No suggestions</p>  |
| <p>Use less PPT-based learning.<br/>Solving actual industrial problems along with theoretical questions.<br/>Rather than just focusing on upper-level new tech it will be helpful if we can implement it. (Like 3d printing - It doesn't work. That should not be happening. we should get hands-on experience.)</p>   |
| <p>More number of industrial visits</p>  |
| <p>Need more industry visit</p>  |
| <p>Projector learning is ok but they should also go with black board teaching method</p>   |
| <p>Good</p>  |
| <p>Good</p>  |
| <p>Give more industrial knowledge to students not give only assignment burden</p>  |
| <p>Assignment test should not be conducted, as it affects the learning process. Cause students are under pressure of only giving and passing test not learning. In time of assignment test lectures or more Industrial Visit or some other application based practical activity should conduct as students learn more from this.<br/>Prelims should be continue as it gives practice to write our exams.</p> |
| <p>1. Industrial Visits<br/>2. Industrial Problems given as Mini Projects to be solved<br/>3. Less Write-ups and More Discussions</p>  |
| <p>Please reduce the time of clg hrs, time for self study should be allotted.</p>  |
| <p>1. Reduce the pressure of exams<br/>2. Principal needs to understand difference between discipline and obedience then only he will able to operate clg in good way.<br/>3. College is not at all supportive when it comes to extra curricular activities.<br/>4. Academic are important but not define our life which institute need to understand.</p>   |

|  |
|--|
| <p>1) Animations can be used to show the difficult concepts rather than only using the photos.<br/>2) Communications skills can be better and whole lecture should not be in English they should also use Hindi or Marathi in between to get larger perspective of the concepts.</p>   |
| <p>Good</p>  |
| <p>Assignment test should not be conducted, as it affects the learning process. Cause students are under pressure of only giving and passing test not learning. In time of assignment test lectures or more Industrial Visit or some other application based practical activity should conduct as students learn more from this.<br/>Prelims should be continue as it gives practice to write our exams.</p>                                       |
| <p>Assignment test should not be conducted, as it affects the learning process. Cause students are under pressure of only giving and passing test not learning. In time of assignment test lectures or more Industrial Visit or some other application based practical activity should conduct as students learn more from this.<br/>Prelims should be continue as it gives practice to write our exams.</p>                                       |
| <p>Assignment test should not be conducted, as it affects the learning process. Cause students are under pressure of only giving and passing test not learning. In time of assignment test lectures or more Industrial Visit or some other application based practical activity should conduct as students learn more from this.<br/>Prelims should be continue as it gives practice to write our exams. But re prelims should be avoided</p>      |
| <p>1. Industrial visits should be more<br/>2. Fine for participating in etamax and other activities should not be taken or should be less (max rs100)<br/>3. All machine shops and laboratories should be Air Conditioned.</p>   |
| <p>More questions and solutions to numericals<br/>Too much noise on the back side of the building from workshop</p>  |
| <p>TMC and HVAC &amp; R are difficult to absorb</p>  |
| <p>very satisfied with the study culture of this college. curricular, extra curricular, placements, everything was managed and executed well by the college. As a Mechanical Engineer, I'm happy that I took admission here.</p>   |
| <p>Need of regular industrial visits.<br/>Need of more practical explanations.<br/>Improve transparency between faculty and student.</p>   |
| <p>More internship opportunity, promoting extra curricular activities, decent industrial visits</p>  |
| <p>1. Teachers should follow some best standard books for good numericals on fundamental subjects which will help students in competitive exams<br/>2. Teachers shouldn't use ppt at all, as it kills the interest in the subject<br/>3. Question papers should be set on little bit difficult side.<br/>4. companies for Internships should come in placement cell.<br/>5. Lectures should not be made monotonous which 90% of prof make it!!</p> |
| <p>Less focus on attendance and allow students to participate in collegiate events</p>   |
| <p>Use the flipped classroom model.<br/>Try to interact with everyone</p>  |
| <p>Better TimeTable Organizing is required.<br/>Attendance criteria could be lowered for final year.<br/>Compulsory events in fests could be avoided.</p>  |
| <p>Good</p>  |

|  |
|--|
| The teacher should be supportive and talk about our weakness and how to improve them .<br>The teacher should go slow with the syllabus and let every student catch up  |
| Taking prelims helps in final exam of the semester but proper study-leaves between the exams will boost the preparation in more better way.  |
| Providing more time for teaching.<br>Conducting extra lectures online  |
| Should not extend lecture every time<br>Last Module are completed very fast without making sure whether the students are getting or not  |
| Teachers should give more practical examples   |
| Should be given more attention to company related technologies.<br>Should give more opportunities for company visit and industrial expertise   |
| VERY GOOD  |
| Should focus on sums more than theory  |
| 1. To reduce the pressurisation and burdensome methods for students like making them write assignments ten times instead of making them understand the concept.<br>2. To give them enough time for extra curricular activities like online courses, competitions, and other club and committees related options which is also an exposure point for students to learn.<br>3. To schedule lectures in such a way that can reduces the daily travelling for just 1/2 lectures and club them together. It will help reduce our energy expenditure in travelling and actually focus on learning. |
| They should be friendly  |
| Teacher should explain the more clear  |
| 1. Faculty should give more real life examples while teaching.<br>2. Increase student-teacher interaction.<br>3. More exposure to current tech in industry.  |
| Not any  |
| More industrial visits,<br>Practical learning  |
| Study Material beforehand for better preparation<br>Less working hours<br>More encouragement on self learning techniques   |
| Don't make 75% attendance compulsory reduce it to 50%  |
| Student-Teacher Interaction<br>Time Management<br>Clarity of Speech  |
| Reduce Strict Rules<br>Include more Application Based things<br>Reduce amount of Submissions   |
| Everything perfect   |
| Practical things should be implemented more<br>There should be more IV to get better experience  |
| 1. Actually implement recommendations given in surveys.<br>2. Eliminate biases while choosing or selecting council members and club members.<br>3. Have a better attitude towards the students.  |
| Placement training should be kept offline  |

|   |
|---|
| 1. Teachers can explain tough concepts by playing immersive videos, explaining the concept with respect to real life applications, for a better grip over it.                                       |
| 2. The Institute can sanction a reasonable number of IVs (atleast 2) per semester, for gaining a better perception over the industrial techniques.  |
| 3. Soft skills and other extra curricular activities can be introduced to the curriculum, so that interested students can enroll into these courses.  |
| 1) keeping the class in order so that other students can hear the lectures<br>2) take action against those who disturb the class<br>3) use more theory and examples to help understand the concepts |
| Teachers should not take time from breaks. And should not keep students waiting just to take presentations.   |
| No comment..  |
| Observation:<br>1. Application based learning<br>2. Encouraging us to learn different techniques of current product<br>3. Trying to do our best   |
| Explaining the theory by giving Real life examples  |
| No  |
| Keep some time period between assignment tests and internal test and also make sure that teachers wont complain about incompleteness of assignments prior to internal test                          |
| Not any   |
| 1. Student Centric Learning should be included to a greater extent<br>2. Students should be allowed for internships in the final year<br>3. Extra curricular activities should be encouraged        |
| Interactive sessions, Practical application knowledge explained well  |
| To have more practical than theory  |
| Lease on attendance criteria for council students and students preparing for further studies  |
| Provides great technical opportunities  |
| Before starting any module try to discuss the topics which are being taught in that particular module.  |
| Can arrange more field visits<br>Can have more relaxation for attendance  |
| All is well   |
| It will be good.  |
| Afzal sir voice is not audible while teaching   |
| If possible, then try to reach every student and ask for their doubts.  |
| NA  |
| To give more practical application and insight about the topic being taught   |
| Having a good experience  |
| 1. To show actual models or 3D view of it while teaching.<br>2. To make lecture interactive   |
| None.   |
| Saturdays should be given off for students to work efficiently  |
| <ul style="list-style-type: none"><li>• In this semester portion should have been done slowly.</li></ul>  |

|  |
|--|
| •If IE would be taught with some examples it will be more easy to understand.  |
| Use better graphics and visual media and new ways of exploring how the students are thinking about the concepts being taught.  |
| 1. More guidance should be provided for practicals and to complete them in time.<br>2. More focus should be on main subjects and exam oriented preparation of subjects instead of mini projects and course projects and assignments.   |
| Teaching is good just need more flexible academic calender   |
| As there is no time for DSE students to prepare for exams atleast teachers should provide question bank to students where we can get a idea what to do in less time, what all topics are important   |
| For DSE Students there must be official holiday on Saturday and specially for mechanical engineering branch . Timing of college must be reduced and give time to self study. Only Exams and exams are going but no time to participate in extra curricular activities.Prelims must not be conducted because no time for us to prepare as compared to normal engineering students.There must no load of ASSIGNMENT TEST as other colleges gives more time for self study .                              |
| Give Time to study   |
| Actually the load of the assignment is very much high... That we(dse students are unable to study for the exams .... As the clg is working on sat also..... Prelims are coming ahead and we are having a lot of prblm in studing.... Sat holiday was needed to us.... But unfortunately it was not available for mech DSE students and which will affect our ut and prelims marks ... Plz take in this consideration and it does not happens with any other dse students (juniors) who will be coming. |
| All good   |
| Please give students proper time to study and understand their subjects. Prelims are not necessary as students are already giving AT1,IA1,AT2,IA2 in between class test.   |
| Please arrange IV for students   |
| 1. Teachers should generate interest in students for that particular subject<br>2. Some of the teachers are just reading the ppt they prepared.<br>3. There are lot of things to do in short time so adjust the college hours accordingly so students can complete all the assignments on time   |
| Students must be assigned extra curricular activities like social services.<br>College timings should be reduced and more time should be given for self studies.<br>Fields like IoT, Python programming, six Sigma must be brought into practical approach and not just be limited for curriculum and studies for exam.<br>Students must be taken to many industrial visits of different engineering branches at least 4-5 times a year  |
| 1. Application based teaching<br>2. Review of basic concepts<br>3. Detailed analysis of performance of student   |
| More focus should be given on applications rather than simply by-hearting the concept.<br>More CAD animations should be used to get a clear idea about the working of a system.<br>It should be more concept building process.   |
| No suggestions   |
| 1) give quizzes<br>2) cover numericals more<br>3) give imp topics  |

Suggestion -

Make students take a MCQ test on the course at the beginning of course.  
take Feed back about which topics was the most difficult and allot batches according to the chapters.

Example if someone is preparing the easy chapters then let him attend the lectures where he/she is facing difficulty.

Meanwhile, the students who have done their studying and review and write research papers or help their seniors in their projects.

Benefits

- 1) Better utilization of time for students and easy for lecturer to handle small class and effectively solve doubts.
- 2) Students will get exposure from the seniors on how to better guide their team when they become seniors.

The syllabus is covered within the described schedule.

Cultural events can be promoted more.

Teaching can be more exam oriented.

1. Better communication with students
2. Better fest organization
3. Less stress on students

1. Teachers should loosen the deadlines of practical submission little bit ( by 2 weeks if practical is once per week) as workload during exams or multiple submissions can be heavy.

2. Teachers and mentors should be little bit more creative in teaching so as to grab attention of students like by stories or experience learning.

3. Teachers should give an update about current industrial happenings in various fields.

Nice teaching no improvement needed

satisfactory doubt solving

- 1) Shift Practicals before Lunchtime
- 2) College Should give us Saturday off for self study.

Prelims before end semester might help prepare better for end semester

Expected questions discussed in the class help to perform well in exams

Every concept is taught thoroughly in every lecture.

Provide more practical knowledge.

1. Locker system should be provided
2. Handwash should be installed in every Girls Washroom

Everything is fine

Not my expertise

Coursework and additional academic activities such as assignment tests and prelims can be reduced so as to provide time for students to engage in extra curricular activities and maintain their academics as well. This will also promote practical learning approach than just writing assignments as a routine.

Overall tution and addressing of lectures is very good and can positively be taken by students to enhance their knowledge.

Great

It will be helpful if more number of practical knowledge is conducted, organizing Industrial visits makes students understand more about the ongoing industrial applications, more ivs should be conducted.

|  |
|--|
| Need to give more Industrial Experience by Industrial Visits and Expert Lectures inviting guests to take where students should be asked about interested topics and select the one.  |
| Nothing as such  |
| good   |
| 1. More importance to practical knowledge.<br>2. Less strict environment.<br>3. Internship activities  |
| Good better best   |
| More of example based learning<br>Use of practical and live examples and apparatus in learning fundamental techniques<br>To do more field visits ,IVs to places of real use to students that may help in the students in their future or careers.  |
| Prelims should've had happened before end semester.<br>Overall teaching and learning experience is good.   |
| overall learning experience is good  |
| Continuous examination should be reduced   |
| Fests can be more fun if better events are allowed to conduct<br>More time should be provided for internship as 1 month is not enough to do any kind of internship and it is really difficult to find such short internships   |
| My Learning experience is great, teachers put all the efforts and explain all the concepts in a simple way.  |
| For internal assessment single paper on single day<br>For prelims give some time to study<br>For project group don't make category it is very nonsense   |
| 1) Co-curricular activities should be introduced on large scale so that everyone could get chance to learn new things.<br>2) Industrial visits should happen more often for knowledge of various fields.<br>3) Assignment test should not be conducted as it affects the learning process. |
| None   |
| 1.Stop Prelims instead give time for preperation or give atleast one day for preparation<br>2. Don't make project group on category basis<br>3. Practicals writeup should be given printed   |
|  |
| Good   |
| Pay equal attention to all.  |
| - Study leave or extra attendance for students appearing fo competitive exams eg: GATE,UPSC etc.   |
| Observations-<br>1. All faculties are really very helpful.<br>2. Faculties deliver deep knowledge regarding subjects.<br>3. Overall teaching facilities are best.  |
| The focus should be on practical learning rather then theoretical concepts   |
| Provide Air conditioners.  |
| 1. Reduce the assignment<br>2. Give proper notes and explain in ppt and board<br>3.give time for submission  |
| If students are in any club so students should be encouraged to take more part rather than saying we don't care you be in any club do everything on time or else leave the club...   |
| .  |

|  |
|--|
| Instead of prelims and assignment test give study leave to study.  |
| No is there  |
| Staff is Focusing on Completing syllabus rather than to make concept more clear.   |
| Plz teach slowly   |
| Reduce teaching hours and give time for self study   |
| Reduce teaching hours and give time for self study   |
| Late Remarks help to be punctual   |
| 1. Review of academics should also be done (like attendance review is done).<br>2. Practice problems should be given for self practice.  |
| need to remove assignment test it doesn't help at all<br>atleast provides question banks for IA exams  |
| Not at all good , they just want to finish the portion never really know that students understand or not   |
| Gap between exams is very less which takes a toll on submissions   |
| Should plan the things before time to complete the assignments well in time n not to keep it for last moment.<br>There is been biased correction of test papers by some of the faculties.<br>Should encourage students for extra curricular activities as theres no participation of students in it. |
| Assembly late remarks should be taken after 8.45 am<br>More time must be given for prelim preparation  |
| 1. Deadlines are too close causing everything to be too hectic, which can be avoided.  |
| 1) Please don't keep the events right before some important examinations as participating without causing problems in academics is not possible<br><br>2) Please provide adequate time to study before tests   |
| The curriculum must add extra curricular activities<br>It's more study/theory centric<br>More practical experience should be provided  |
| All good   |
| 1. use less ppt for teaching.<br>2. use real life examples gor reference.<br>3. take regular test for practice in a week.  |
| Teachers should take a little more efforts to understand students.   |
| Overall good   |
| the academic section in the student login portal is not opening and there are a lot of glitches in portal. i kindly request the authority to look into this  |
| Use blackboard for numericals atleast.   |
| Atleast use blackboard for numericals  |
| Overall teaching is good   |
| Atleast use blackboard to solve numericals which will help in understanding the problem more effectively   |
| For non core topics please take extra lecture  |
| Taking Prelim is ok for preparation of end sem exams but taking re-prelim, re-re prelim, re-re-re prelim until student clear it makes it burden on (us) students usually during the final submission of all journal  |

|  |
|--|
| Proper Ppts<br>Appropriate textbooks for each subject<br>Management of lectures  |
| 1. Organize more industrial visits.<br>2. Encourage higher studies as much as placements.<br>3. Have provisions to fund potential students.  |
| Focus more on learning and less on submission deadlines.<br>For a practical, 18 students is a large group. Batch size should be reduced.<br>Industrial Visits should be more.  |
| Teachers should ensure active student Participation in class making it more interactive.   |
| Academics and attendance have top priority and if one is participating in any extra curricular activity, he has to manage everything. He is not exempted for anything. As per my suggestion extra curricular activities should be given higher priority and not only academics and attendance as they will make student dumb in terms of knowledge and experience. |
| 1. Teachers should focus on engaging well with students during lectures.<br>2. Attendance for extra activities can be managed well.  |
| Reduce the load from the students, prelims should not take place so that it will be easy for the students to complete their submissions and syllabus can also be covered on time as teachers will get extra one week.  |
| The clg events made should not be made compulsory and if made so the students should be given some freedom in that so that students can also enjoy. And provide proper dates not just before exams ...the students get stress as after events there are exams so they think there should not be event conduction only, and so students dont show interest          |
| Good   |
| Numerical solved in class also should be provided in PPT it help in crosschecking answer and also help the student who is absent for that days .   |
| Make the system better<br>Less assignments and more real hand practical experience<br>Ease in time table   |
| Portion completed too Fast<br>Exam conducted everytime   |
| More practical examples<br>Hands on experience   |
| Nothing  |
| Engage every student in learning the concept be it practical session or theory classes.<br>understand the every student's grasping level<br>Not to overburden with constant study pressure and exams.  |
| Install or put air conditioning system in class room   |
| Less Assignments<br>More Practical Sessions and exams<br>More Industrial Visits to industries  |
| Reduce the number of exams taken per sem<br>Students don't get enough time to study and complete assignments parallely.  |
| Less assignments<br>Less number of extra lecture<br>Proper exam time table planning  |
| Running for completion of portion and not giving enough time for studying...   |
| question banks for every subject .   |

|  |
|--|
| Attendance should be not compulsory  |
| No suggestions   |
| 1) Use better graphics and visual media to engage students well. ... 2) Try to reach every student and ask for their doubts. ... 3) Make teaching a two way interaction.   |
| Too much mental stress of completions and reprep. Too strict for a college.  |
| Do not made compulsory in to participate each and every some of them are good but most of them unnecessary<br>They should cancel assignment tests because it unnecessary cuts the teachings learning time and it is hectic for both students as well as for teachers and it ultimately only leads to only completing activities according to schedule it doesn't add any value to the students   |
| The Institute is doing great no suggestions  |
| 1. Good practical examples given<br>2. interactive learning<br>3. good guidance from the faculty   |
| None   |
| Remove prelims or else reprep and don't over burden students with Your extra curriculum stuff.<br>Also the participation in fest and event should not be compulsory.   |
| 1) Incorporate active learning strategies<br>2) Use technology effectively<br>3) Provide regular feedback  |
| There shouldnt be 2 IA exam on a single day. The portion should be completed with a considerable pace. More practical based teaching could be implemented.   |
| Make courses more industry oriented.<br>Increased teacher-student interaction.<br>Better infrastructure in labs  |
| 1) Classes should be made more interesting rather than just rushing to complete syllabus. A good way to get an idea of how to do this could be found on YouTube. Take notes on how they relate the syllabus content to real world applications which is much more interesting than just mugging up the coursework.<br>2) Reduce unnecessary written work, it is obsolete in this time and age. Instead provide activities that inculcate interest among students towards learning.<br>A simple example could be giving a specific task to be completed, but there are no restrictions on how it is finished. Each submission should be given a holistic review.<br>3) Give more freedom to students in context of internships and exchange opportunities. The time constraints set up for these activities make it really hard for students to find any useful opportunities since most of these are atleast 2 months long. Look into partnering with some companies to provide such opportunities for students.<br>4) Reward high achieving students with incentives such as cash prizes to motivate other students to work harder in their academics. Popularize the various clubs in the college and provide them with a certain level of independence. More support should be given to these clubs in terms of funding and learning resources. This will help students learn while having fun and will improve the image of the institution among students as well as general public |
| no need of any suggestions my institution is great   |
| Nice teaching  |
| No assembly<br>No attendance criteria<br>Friendly environment  |

|   |
|---|
| Stop Morning assembly<br>Make college environment friendly<br>Make submission process systematic and not hectic   |
| No assembly<br>No attendance criteria<br>Friendly environment   |
| No assembly<br>No attendance criteria<br>Friendly environment   |
| Assignments typed on word to be accepted.   |
| Interaction should be increased<br>Less academic work should be given as our institute takes 3 extra exams already<br>Mini project related work should be little lenient  |
| No Assignment tests<br>No fine on etamax<br>Annual trip( non industrial)  |
| Reduce termwork<br>Teach practicaly<br>Give oppotunity for student to do self deveploment,rather than rusing the sylabus  |
| Promote extra curricular<br>Tone down strictness  |
| 1) Cancelled all the At exams it's totally waste of our time<br>2)Don't make students feel like hectic schedule<br>3) Give more priority and importance to students decision ex. Forming mini project group by their own itself without any cgpi criteria   |
| Change in AT and IA timetables  |
| Let us have free time   |
| Understand student<br>Encourage them if they participate in international level competition   |
| the prelims at1&2 system is a torture for the students teachers literally make you write the entire thing for 5 times in the submission to just give a sign i mean we all are mentally harrassed by this teaching is good doubt solving his good there should be some punishment but writting the prelim paper for 5 times is a nightmare that we all students face |
| Reduce Assignment<br>Give proper timing for submission<br>No assembly   |
| Project groups should me made on the social and mutual interest of the students rather than categories based on student academic performance.   |
| Less time should be given for cultural events and that time should be given in actual studies and more Industrial Visits.   |
| Good  |
| More hands on experience<br>More support to the collegiate clubs  |
| Industrial Visits should be given importance<br>Internship should be encouraged more  |

|  |
|--|
| No attendance<br>No compulsory fest<br>We want annual trip not just iv   |
| 1) You can provide e learning to the concepts  |
| No suggestions   |
| Its Ok   |
| 1)reduce burden<br>2)just reduce burden<br>3)I repeat just reduce burden   |
| On board handwriting   |
| My suggestion will be that, The learning should be more practical based rather than theory.  |
| 1)better understanding the pace of students<br>2) building relevant and comfortable environment in class<br>3) not running through the syllabus  |
| reduce the write up required for submission 3 pages is enough for a lab report. 8-10 pages for write ups? seriously, does the institute wants just loads of pages written by a student or he/she should study for better performance. These write ups take way too much time to complete   |
| 1. Provide short notes for Chemistry and Physics as notes provided by teachers are of 40-50 pages. By short notes I mean summary of whole chapter in 2-3 pages.<br>2. (Observation): Maths lectures are excellent. Each and every concept is first taught systematically with one concept taught and immediately 2-3 questions on that concept and then to next one. Homework questions related to same concepts are given. Also Rakhi Ma'am is extremely understanding as in from a student's perspective and also helps in non-academic problems.  |
| 1] Too many college hours. should reduce college timing so that students can get more time to self study and do extra curricular courses to develop their resume.<br>2] Too many unnecessary assignments and illogical practical writeups takes up students time to study self study.<br>3] Should arrange better college fests.   |
| Should wear mic always   |
| More focus on basics;<br>In-detail analysis of topics;<br>More time to study.  |
| 1.Emphasize active learning: Passive learning, where students are merely listening to lectures or reading material, can be ineffective. It is essential to incorporate active learning strategies such as group discussions, hands-on activities, and problem-solving exercises. These activities can help students engage with the material, develop critical thinking skills, and retain information better.<br>2.ncourage student autonomy: Encouraging student autonomy can help students take ownership of their learning and become more engaged in the process. Teachers can achieve this by providing opportunities for self-directed learning, encouraging students to ask questions, and giving them control over their learning experience. For example, teachers can provide students with a choice of assignments or allow them to select their research topics. This can help students feel more invested in their learning and motivated to succeed.<br>3.Foster a positive learning environment: The classroom environment plays a significant role in student engagement and motivation. Teachers should strive to create a positive learning environment that is inclusive, supportive, and encourages student participation. This can be achieved through various methods, such as promoting respect and open communication, recognizing and valuing diversity, and creating opportunities for student input. |
| -  |

|  |
|--|
| COLLEGE TIMINGS COULD BE POSSIBLY REVISED FOR US TO HAVE MORE TIME FOR SELF STUDY.   |
| -  |
| Unnecessary remedial should be avoided<br>Prelims exams should be made optional<br>Freedom of attendance (should not be extreme strict)  |
| Too much written work  |
| Improve learning equipment in class  |
| Number of assignments per subject should be reduced as to increase time for extra curriculum learning such as internships. Also it may give us extra time for self study as well.  |
| Written assignment can be replaced by soft copy  |
| .  |
| The learning experience is good. Teachers are very supportive.   |
| Modern technology<br>Moder teaching methods<br>Case study method   |
| Reduce college hours   |
| Good<br>Nice<br>Excellent  |
| 1. Project submission dates should be given atleast 15 days prior submission<br>2. Practical Write Ups should be given atleast 3 days before actual practicals for speedy submissions  |
| nice.  |
| Ok   |
| Good enough  |
| No improvement required  |
| Teachers are involving as much as possible.<br>For suggestion, More extra co-curricular could be implemented   |
| Need to provide more extra-curricular opportunities to students and engage them in technical clubs   |
| No improvement needed, everything is perfect   |
| Too strict , not getting time to focus on personal skills  |
| Good learning experience   |
| Should improve quality of teaching<br>Should provide all ppt and content to syllabus   |
| Teachers are more focused on completing the syllabus than making students understand the concepts. Remedials lectures are used to complete portion. Teachers rarely discuss about real life application of topics thought. I am deeply disappointed by the process of teaching in this college. Maybe I will come out as an arrogant student but believe me many students are facing this problem and are dont have courage to tell it. Some students have zero interest in the branch and cause chaos in the class. |
| Each semester or atleast year students should be take to Industrial Visits.  |
| 1)most of the sums should be solved on board rather than dictation<br>2)most of the lab exps are not explained properly.   |
| 1) Sums should be solved on board rather than dictation<br>2) Experiments are not explained properly<br>3) Emphasis on Board teaching  |

|   |
|---|
| Lesser burden<br>More lesser<br>Should be lesser  |
| Need less writeups  |
| Should take extra classes specially for dse<br>And give more examples as hw   |
| too strict, not giving time for developing personal skills  |
| ..  |
| Make the learning process more based on applications with real life use...<br>Studying hours of college should be reduced to get time for self study.   |
| 1) less emphasis on writeups<br>2) College attendance should be flexible<br>3) Attendance criteria should not follow compulsory 75%   |
| It's been a very good experience until now but a little hectic for our batch due to compact semester  |
| Too many lectures in a day<br>Very difficult to carry out other activities<br>Might as well call it a school rather than an institution of technology   |
| There should be atleast one day gap between each paper of Internal assessment.<br>The lectures should not exceed 3:30 or 4:00, as we don't get enough time to complete the writing work or for self study   |
| By encouraging cooperative learning relating the topic by example occuring in day to day life basis   |
| .   |
| I think teachers could be a bit more available so as to get our doubts cleared  |
| -   |
| Everything is fine with me personally and I'm totally satisfied with the rules followed bythe institute   |
| The completion of syllabus is rushed.<br>In-class practice sessions can be increased.   |
| 1.Good teaching<br>2.Internship program/course suggestion to be given to students   |
| Some teachers must realise that they are teachers.  |
| the time spent in college is a lot considering the amount of upskilling we have to do to be ready in the industry. the things taught in classes will not be fully required in our carrer but having such a increased schedule everyday of the week leaves little to no time for self growth and being ready for this competitive industry |
| The Explanations of the topics were very easy to understand. The teachers guided us if we didn't understand something.  |
| Nil   |
| Wrong decision to study here  |
| All teachers take utmost efforts in teaching and clearing the concepts.<br>Attendance monitoring is regularly done.<br>No industrial visit of any sort was conducted.   |
| 1. Promoting Semester long Internship Opportunities.<br>2. Inclusion of Hands-on Experience such as Hackathon, Ideathon etc.<br>3. Teaching is Very good and thorough.  |

|  |
|--|
| 1.)share notes on teams/outlook more often<br>2.)can explain topics more deeply  |
| Introduce group study, Make group of students their aptitude in studies, it may help them to move forward  |
| Topics should not be taught because it comes in exam. It should be discussed for knowledge.  |
| 1) Be little lenient towards the teaching and learning process.<br>2) Don't overload your students with assignments and projects.<br>3) Strictness should be reduced.  |
| We could use more time for project and other activities we need it.  |
| Good labs, great teachers  |
| No , they do their best <i>100</i>   |
| 1. Class activities should be conducted for self learning process<br>2. Analogies with real life experiences should be given for better understanding<br>3. Students progress should be closely observed throughout the semester.                                |
| When there are numericals the technique to teach should be board and check whenever it is lengthy problem  |
| Teaching hours were beyond hectic.... Self study was next to impossible  |
| Reduce assignments   |
| 1. Permitting students to complete their assignments when teacher is not teaching.<br>2. Allow students to use washrooms/fill bottles in a 2hr lecture/session(requirement of 5min break).<br>3. Improve the availability of apparatus needed for mini projects. |
| 1) Reduce the number of assignments<br>2) remedial lectures be used only for doubt solving<br>3)improve availability of apparatus needed for mini project including the softwares used in mini project   |
| -  |
| 1. more of extra curricular activities should be encouraged<br>2. practical learning should be the main focus rather than theoretical<br>3. teachers should be more open to students in terms of both academics and non academic.                                |
| no   |
| 1) Teaching should be based on more practical applications and the latest trends in the industries<br>2) The assignments and tests should test the students creativity rather than just writing the definitions and straight forward questions                   |
| 1. More Industrial overview needed<br>2. More practical learning<br>3. Give students time to learn new skills other than the curriculum  |
| Overall teaching-learning experience is good so I don't have any suggestions   |
| More workshops and alumni meetups  |
| Nothing as such  |
| Good   |
| 1 Include more hands - on practice<br>2 Improve Time Management for lecture schedule   |
| No suggestions   |
| None   |
| no suggestions as such, the teaching was great   |
| .  |

|  |
|--|
| Very good, excellent, engaging   |
| Happy with the current situation   |
| Less learning and more exams very hectic mentally drained  |
| Allow remedial lectures to be remedial   |
| Good teaching overall  |
| :)   |
| Less compulsion and pressure for submissions   |
| 1. The schedule is so hectic that it feels tiresome and hence people bunk the college.<br>2. The no. of assignments and the short semester leads to incomplete assignments and failure of doing self-study.<br>3. Either the timings must be reduced or the strictness of the attendance.                      |
| 1-Dont convert remedial lectures to regular ones<br>2-make us practice questions after a topic is discussed.   |
| The syllabus is going very fast I agree that because of covid admission got delayed but its not our fault why are we suffering?  |
| Not much in depth teaching is done for most subjects.  |
| It's nice  |
| Good faculty   |
| The classes can be more interactive<br>The rate of completion of syllabus should be lowered  |
| Student approach , helping the students, advising the students   |
| Due to back to back exams and write up submissions students don't get enough time to study and prepare for IA's  |
| 1) Field trips<br>2) significant gap to study between AT and IA<br>3)Lab facilities can be improved (AC lab, constant power supply etc)  |
| 1.Teachers should talk every student individually<br>2.Daily doubt solving session   |
| Already improved   |
| Don't take prelims   |
| Being friendly with students   |
| No suggestions as such.  |
| 1. Breaks must be provided in between lectures as sitting for an hour is exhausting(example 50 min lecture followed by 10 min break)<br>2. The writing of papers after failure must be removed as all the students literally copy it from a single student.<br>3. lectures till 4:30 become too much sometimes |
| Seminars relating to financial knowledge should be conducted   |
| No   |
| Encourage for Technical Internships  |
| College timing is very long,reduce it  |
| Almost everything i feel is good.  |
| Nil  |

|  |
|--|
| The way they teaches us are good   |
| 1. More notes<br>2. Practical experience<br>3. Real world examples   |
| Emphasize more on practical learning approach.<br>Strictness on attendance can be lifted up a bit for allowing students to pursue extra-curricular activities as well.<br>Making assignments more interactive.   |
| Good   |
| focus more on personal growth, please give internal marks generously as it affects our marks and percentage,conduct extra curricular activities more often   |
| It was really a good learning experience   |
| Discard the preliminary and assignment test it is useless and waste of time. And make effort to conduct industrial visits.   |
| Good teaching by hand some areas of improvement for more engaging learning   |
| Great  |
| Nice   |
| Good   |
| Should decrease the burden...<br>Should have more of modern writings and notes instead of pages.   |
| Decrease the assignment and test pressure.   |
| All good   |
| Good   |
| More informative visits to industries can be planned for actual practical approach   |
| No suggestions   |
| Giving more time to study rather than taking tests back to back which effects on time management for mid sem exams and other major tests   |
| No Improvement Required  |
| Practical learning<br>Teaching topics with recent trends   |
| I guess my suggestion will be to reduce AT test as it dont count any serious internal assesment marks . So we the students can focus n our submission part as well as on our study part. I know that these AT test are for our improvement but due to this we dont get much time to complete other things which really do count our marks. |
| .  |
| None..All perfect for the brightest future of technology   |
| I think not required any suggestion  |
| All the teaching -learning process is good.No changes required from my view...   |
| I am extremely satisfied with the current teaching and learning environment in FCRIT, Vashi.   |
| GOOD   |
| Take minimal tests and focus on students overall development<br>Improvising some skill to students<br>Taking some real life application  |
| Teaching is good in my institute.  |
| Good teaching  |

|  |
|--|
| Everything is good   |
| nothin, all is good  |
| Nothing such   |
| My observations are use of interactive methods, use of technology and encouragement through feedback   |
| The staff is very Good   |
| Doesn't need to improve. Excellent teaching  |
| (1) Notes/PPT of the module taught should be uploaded immediately after the successful completion of the particular module so that students can start preparing for that topic as early as possible.<br>(2) Nothing as such required, the institution and the faculties give their best for each and every student.<br>(3) The institution has adopted outcome based education policy and done it's best in overall teaching/learning process. |
| No suggestions   |
| Everything seems good  |
| Teach practically  |
| No comments  |
| All the things are worry well  |
| The teachers are very well-equipped with sources and information to help the students understand efficiently. The overall experience is joyful and informative.  |
| Nothing is to be required all things are perfect and on time   |
| No suggestions all good.   |
| 1. Teachers are good but some are stubborn and very rude.<br>2. Teachers need to increase the students interaction and be more friendly.<br>3. Start to complete portion in time, because it gives rise to some extra lec and disturbance in timetable of not only the the but personal as well.   |
| .  |
| Teachers can use mic so that everyone can hear them, please write in a big handwriting on the board so the written content is visible to last benches, can use pointing sticks while teaching from a projector   |
| Good Learning experience<br>Nothing, all good.   |
| Making students comfortable  |
| The institute is good for academic culture, the institute should focus on to improve cultural activities, college fest, internship, industrial visit etc   |
| Concession regarding assignments should be there.<br>Sufficient time between prelims and IAs.  |
| Should arrange some industrial visits.   |
| Nothing such   |
| 1. Implementation of Teacher for a day concept.<br>2. Implementation of Teachers are also Students (where students teach teachers about current trends).<br>3. More of Industrial Visits   |
| More practical teaching approach should be adapted   |
| More Industrial/field visits should be organized<br>More Guest lectures should be Organized  |

|   |
|---|
| Solve mathematical problem occurred in designing subject on board of oral dictation.  |
| NO Suggestions from me  |
| Teachers should take real life examples while teaching.   |
| Teachers should take real life examples while teaching  |
| Excellent 👍   |
| Provide practical exposure to the students while teaching various concepts and make them understanding with logical thinking and should be able to imagine how the things work in real world.<br>Give attention to individual student in order to cope up with their weaknesses.<br>While performing experiments in laboratories, provide the extra knowledge about the concepts, their applications, the instruments used to perform etc , this will greatly enhance the learning process and will make them more enthusiastic about their domain. |
| Nothing. Everything is very nice  |
| Need more practical   |
| Strictness<br>Daily Homework<br>Discussions   |
| Sports should also be promoted in college.<br>Break time to be increased.<br>Students picnic should be organised.   |
| NA  |
| teachers are not able to transfer knowledge   |
| Allow students dedicate more time for on site internship opportunities rather than giving more emphasis on attending lectures because industrial experience pays off better in long run and even gives a lot of exposure to industry experts and it's other integral aspects.<br>Memorizing stuff should be reduced and process oriented learning methods should be emulated rather than result oriented learning approach.   |
| NA  |
| 1.share the Ans with student after paper check.   |
| 1.Good Overall Teaching<br>2.easy understanding<br>3. Need of equipments in labs.   |
| 1. They should encourage more to participate in extra curricular activities.<br>2. They should emphasis more on application based teaching rather only theoretical.<br>3. They should upgrade the labs and their softwares.   |
| .   |
| 1. Financial encouragement towards Technical clubs<br>2. latest Software tools which are effectively used in Industry must utilise<br>3. Upgradation of lab equipment must be done specifically in PIC system   |
| Time for self development, Freedom to do internships in the final semester, Getting rid of the system of Hand-writing assignments.  |

|   |
|---|
| 1. Application based teaching can be brought into picture .   |
| 2. Upgrading the lab equipment and bringing new equipment is necessary.   |
| 3. Extra curriculum activities are promoted but financial aid as well as equipments needed for the projects/competition is a problem.     |
| 4. Software technology which are needed in the core companies should be brought into the syllabus.  |
| 5. Along with engineering syllabus,special courses for business management, stock market,financial education should be introduced         |
| 6. Industrial visits and internship opportunities for 3 months tenure can be encouraged   |
| Increase the time period of semester as it is getting hectic  |
| -   |
| No suggestions because most of syllabus is covered in class and teachers are so co-operative  |
| It's sometimes a hectic schedule but it helps a lot to study on time and there is less pressure at finals. Everything is well managed.    |
| Good  |
| Na  |
| Concept wise with practical applications teaching observed  |
| only thing that we miss out is some well planned IV's and field visit.  |
| Everything is Good  |
| -   |
| Good  |
| Should be allowed to go for longer time (3months) of internships.<br>More clubs related to Electrical fields.<br>More practical approach. |
| Help Students in career guidance, More Approach towards skill-based Learning  |
| To increase more practical working hours.<br>To provide more internship opportunities.  |
| Nothing to improve..All good  |
| 1. Removal of Prelims as a submission requirement.<br>2. More field trips.<br>3. More time for self-study should be given                 |
| None  |
| Generate Humour in the class  |
| Good  |
| Practical based learning<br>More courses on upcoming technologies<br>Less assignment tests  |
| Core values of college itself are bit questionable.   |
| .   |

|   |
|---|
| <p>The teaching method should be changed. Now a days student takes least interest in learning hence its necessary to have effective methods to involve students and inculcate proper knowledge to identify and able to provide solutions. Should discuss the fundamentals of engineering in real life through proper practicals showing the experiments instead of conventional lab experiments. Just to finish the portion and cover 10 experiments, this mindset should be changed. Knowledge imparted must be refined again and again to know the exact correct things instead of asking these problem in vivas where proper answer is expected. Humble request to change methodology to awake interest in students to pursue engineering.</p> |
| <p>Teaching should be more of pratical than theory</p>  |
| <p>1) Stop assignment tests<br/>2) Arrange proper IVs<br/>3) Reduce Home assignments</p>  |
| <p>.</p>  |
| <p>Interactive</p>  |
| <p>Practically explaining concepts</p>  |
| <p>Na</p>   |
| <p>1) Quality of teaching learning process is very good<br/>2) Efforts taken by faculties to inculcate life skills is immense.<br/>3)The institution takes effort to engage students in the monitoring, review and continuous quality improvement</p>   |
| <p>Good</p>   |
| <p>1)Quality of teaching in institute is very good<br/>2)Efforts are made by faculties to inculcate life skills.<br/>3)The institution makes effort to engage students in the monitoring, review and continuous quality improvement</p>   |
| <p>NA</p>   |
| <p>No suggestions</p>   |
| <p>Instead of conducting prelims, just give the paper to write at home and self analyse<br/>Dont have hectic schedule for us<br/>Need a final year trip</p>   |
| <p>Everything so far so good nothing to improve</p>   |
| <p>Overall the institute is good</p>  |
| <p>Reduce the number test and exam besides official exams</p>   |
| <p>ACM teacher shall give clear questions that can come in exam</p>   |
| <p>To conduct practicals or experiment for all subjects, related to the theory of the module as required.</p>   |
| <p>1. Experienced in teaching and practical<br/>2. Helping to overcome doubts<br/>3. Great content in teaching</p>  |
| <p>Institute Should focus on student interest in their favourite topic instead of following syllabus, tests, submission,etc.</p>  |
| <p>No suggestions.</p>  |
| <p>Great support from teacher and overall quality of learning is great</p>  |
| <p>No suggestion</p>  |
| <p>no suggestions always give us best in academics</p>  |
| <p>More practical<br/>Industrial visits<br/>Practical industrial experience</p>   |

|  |
|--|
| Focus should be on more teaching rather than assignment test prelims , because of this the portion at the last is not completed and the last chapters are rushed.                    |
| Sports opportunities must be provided, to compete on college level.<br>Extra Co-curricular activities must be improved more, like iv.  |
| None   |
| Provide inhouse internships.   |
| 1) better presentations<br>2) proper timing<br>3) extra lectures   |
| .  |
| Reduce no of test and retest   |
| No suggestions   |
| Give time for extra curricular<br>Reduce no. Of unnecessary tests  |
| Give attention to all students<br>Don't be in favour of toppers only   |
| Good   |
| everything's excellent   |
| 1. There are too much exams<br>2. Teaching process is good   |
| The teachers should be more lenient over the submissions. Since students also have the other subjects to do so   |
| .  |
| Some times there is conversation gap between teachers and students.  |
| Nothing  |
| It was very good   |
| Good   |
| Everything is fine   |
| Share proper notes   |
| More iv  |
| Excellent  |
| Improve Communication Skills   |
| Good   |
| No need of improvement   |
| No need  |
| Equality between all types of students   |
| Focus more on practicals rather than theory  |
| Teaching process feels overwhelming at times as it is rushed because of extra exams taken, some teachers only read from ppt rarely teachers will teach something new and interesting |
| 1. Sessions could be more interactive<br>2. Practical knowledge should be given more emphasis  |
| .  |
| None   |
| Excellent!   |
| -  |

|   |
|---|
| From vashi station to college there should be a bus or else share auto price should be reduced to ₹10   |
| Less emphasis on written submissions<br>More importance to practical knowledge<br>Provide on campus internships   |
| 1. The assignment tests are not graded and returned before the internal assessments sometimes, which if done, could help with performance by knowing where the student is weak.<br>2. Use of the LCD projector is good but teaching sometimes feels restricted to it.<br>3. Good course material coverage was observed.   |
| 1. IT department should be shifted to new building.<br>2. The classes in old building needs exhaust fans.   |
| Engage students in practical learning, give real life examples to help in understanding the concepts  |
| Higher studies in abroad process and process elaboration.   |
| -reduction in compulsory criteria<br>-more explanation during practicals<br>-more practical demonstration   |
| - More of practical learning approach rather than written work in Lab Experiments.<br>- Logic based learning should be promoted<br>- Assistance for Internship should be provided   |
| It's all ok   |
| Try to give some real life examples to demonstrate the concepts.  |
| 1. Suggestion: Adding videos to the ppts would be a great addition to help students understand concepts more thoroughly<br>2. Suggestion: After completing modules, more activities like mind mapping could be included.<br>3. Observation: Carefully curated ppts.   |
| More practicals than theory, availability of printers should be increased, more interactive teaching needed   |
| 1. All teachers explain the concept by giving example and applications which makes it easier to understand.<br>2. They try to tell us our weak points so that we can work on them.<br>3. Project Guide always check on our daily works completed.   |
| Firstly, a lot of stress is given on theoretical assignments and practicals. Like all those handwritten assignments need to be compulsorily submitted by student in written form, As a result of which, it becomes very difficult to manage time and give proper time for self study. What I strongly suggest is to make this submission process of assignments and practicals an online process i.e. submitting the practicals all online on Microsoft teams. It saves a lot of time. Most of the practicals can be submitted in doc form. The ones which ought to be written should only be given as written work. This saved time can be utilised by student in many effective and useful tasks. And what it does is relieves the student from that added pressure of so much writing stuff. Because at the end what college does is throws all the students' writeups and journals in RADDI. I have myself seen this. It also doesn't feel right that after taking so many efforts we write everything and what we get to see is that all that is thrown in large trucks and taken away as RADDI as if it is useless. It literally ignites us and also makes us feel very bad for the college's study in. But we are able to do nothing. Thus I feel, all these submissions and all can be taken in doc form at least for CS and IT students for whom I know that it is possible to do so. I have no idea about the pattern of other batches. |
| Other all things I feel are good.   |

|  |
|--|
| 1. Teaching learning process can be more effective<br>2. time management of teaching the course can be improved<br>3. Concepts or practice sessions of numericals should be taken time to time.  |
| -  |
| 1. change the syllabus<br>2. make sure teachers know the changed syllabus<br>3. Remove handwritten practicals like theory  |
| Everything is Great  |
| Very good, excellent, accurate   |
| A little less exams/topic wise test should be conducted so that we get more time to study for internal assignment test and end semester  |
| Institute should focus on overall Learning rather than only marks<br><br>Teachers should give quality notes which won't waste our time to refer other books<br><br>Institute time table should be till 4:00 pm because after 4:00 pm it gets rushy in the local trains                                 |
| .  |
| A little practical examples and more of easier way to make students understand   |
| Should encourage students to take part in cultural and technical events<br>Should be supportive  |
| Nothing to tell for now  |
| Problems should solve on board not on screen   |
| Provide ppts or documents before completing chapter for revision and self-learning.  |
| As some teachers are lenient students in the class disturb the class all the time so teachers should take some action towards them   |
| I m having a great experience learning here...teachers are well prepared before teaching any concept there is no need of any extra classes after the teaching of faculties..   |
| Satisfied  |
| Need more attention in real life skills rather than bookish knowledge  |
| Doubt-solving<br>More student centric learning<br>Surprise tests   |
| Multiple revision, detailed explanation, close monitoring on each students   |
| Nil  |
| Everything is good   |
| Encourage more participation in sports   |
| Everythings good   |
| Everything is good   |
| No   |
| Everything is very good  |
| 1. Teachers should use both the languages that is English and Hindi to help students understand the concepts. Teaching in english is good but sometimes the concepts becomes clearer when they are taught in other languages.<br>2. Overall learning experience in my institution is undoubtedly good. |
| Good Teaching  |
| Should help in promoting extra curricular activities   |

|  |
|--|
| Guiding Students,<br>Helping them understanding concepts of studies ,<br>Helping Students in the preparation of the examinations .   |
| Everything is up to the mark   |
| Notes should be provided as soon as possible<br>Institution should maintain that strictness of punctuality like not allowing students after 9am in the college untill and unless the matter is serious<br>Institution should provide sufficient books available to their students in library as there are no books available when needed |
| To have 5mins break between lectures.  |
| 1. Encourage and allow students to take part in extracurricular activities like sports.<br>2. Student should atleast get some amount of time to focus on health and fitness.<br>3. Teaching should be made more immersive.   |
| It is great  |
| Take revisions next day onwards of each subject means a fast recap Give questions important for paper in the end of every lecture  |
| Moderate   |
| Teachers must interact with students and be free to them and they must also share were students lack behind  |
| The overall teaching is good   |
| .  |
| 1 practical marks are not given according to performance.  |
| All good   |
| 1. Industrial visits too should be a part of curriculum.   |
| no   |
| Overall teaching-learning experience is good.  |
| .  |
| Good   |
| Good   |
| Explanation about the topic can be given during practicals and left out students ( those who aren't able to perform the practicals successfully) must be guided.<br><br>If question asked multiple times still a polite answer is expected.<br><br>Student's feedback is taken but there must be some actions to it.                     |
| .  |
| Better interaction,Good teaching skills and friendliness of professors   |
| Please Include more practical learning than theoretical, hoping for a 1 on 1 teacher student interaction in the class  |
| Good   |
| 1.Increase more focus on developing skills<br>2.Giving student time from academic to develop more interest<br>3.Providing more support for hackthon and intership  |
| Time Management<br>Proper Planning<br>More use of available resources  |

|   |
|---|
| Time Management<br>Proper planning<br>More use of available resources   |
| Good  |
| PPTs and blackboard should be used simultaneously; From the back benches blackboard is not completely visible.  |
| 1) focusing on students skills on languagesmak  |
| I think there should be no change, every teacher teaches well, I can understand all subjects with the meaning   |
| Excellent teaching<br>Regular basis assignments<br>Excellent practical sessions   |
| Some faculty members just tend to complete their syllabus anyhow. Student's understanding is not taken into consideration. All the topics should be given a good amount of time to explain properly and not overburden the students with teaching 4-5 concepts at a time. |
| No comments excellent.  |
| students participation can be done nicely   |
| Great teaching methods  |
| The PPTs should be updated as per latest syllabus.<br>More reference material should be given.<br>More practical examples should be explained in the lectures.  |
| Good  |
| No  |
| 1) Teachers should make learning more fun.<br>2) Practical knowledge should be concentrated more.<br>3) More focus should be given to the application and intuition part and not on how to get more than 90% marks.   |
| Give less assignments so that we can do other projects  |
| Good teaching, good mentorship, teacher complete syllabus on time   |
| .   |
| The learning objective is aligned with learning outcome.  |
| No suggestions  |
| 1. visualize teaching<br>2. discussions<br>3. encourage for communication   |
| More practical learning than theoretical  |
| 1. Group discussion activities<br>2. Real life example implementation<br>These might help in better learning  |
| I personally have observed that teachers are trying to help but students are somewhat reluctant towards even talking to them properly..maybe that is affecting the learning experience to some extent   |
| null  |
| Make the sessions interactive by holding various activities   |

|   |
|---|
| 1. Recomend to check all pc , projector working before start of the day by non teaching staff<br>2. Recomend to check all laptops are working before lab session<br>3. Recomend to allow practicals in print form |
| Reduce fines, Conduct at least one Industrial visit, Renovate washrooms. Department and teaching staff is good.   |
| .   |
| Writing experiments should be reduced   |
| Nothing   |
| Dont take unnecessary money from students in the name of illegal fines  |
| If teachers could complete syllabus before prelims and give question bank according to Mumbai University previous year questions  |
| Reduce hand-written assignments and practical writeups so we can focus more on practical skills   |
| Renovate the old building, improve lab facility, remove fine concept, introduce Air conditioned Lab   |
| .   |
| Ppts to be improved<br>Proper content for exams<br>Study material in ppt or notes   |
| Everything is perfect   |
| B   |
| We should be allowed digital notes.<br>Some practicals should be allowed to have prints.<br>Laptops should be upgraded.   |
| None  |
| Less rote learning, less boring presentation, more project based learning   |
| No suggestions  |
| None  |
| Good  |
| Excellent   |
| More focus should be given on applications  |
| -   |
| interactive   |
| Reduce unnecessary writing work<br>Give more time to students to learn new skills   |
| All teachers of our IT department are amazing   |
| Nothing   |
| ...   |
| Change graphics teacher and put bippin sir instead of the current one   |
| College timings should be reduced as we students gets quite less time for self study  |
| Overall good code of conduct  |
| Nil   |
| 1.teacher should treat students better<br>2.lectures are very boring<br>3. Install ac in a class<br>4. Beaches are very small<br>5. Dustbin are not their in class  |
| Great   |

|   |
|---|
| Provide us with comfortable benches<br>Install AC in the classroom<br>Extend the break by 15 mins   |
| No comments   |
| 1.Reduce syllabus   |
| Very good   |
| Teachers are very professional in their fields.<br>They try their best to reach out to each and every student.<br>Suggestion:<br>Academic calendar, assignments should be made feasible keeping the students wellbeing in mind. |
| No suggestions required, everything is perfect  |
| It is great experience  |
| Teaching is very effective  |
| No suggestion   |
| Yes   |
| Requirements dustbins and A/C in classrooms along with better benches   |
| Can improve timetable for the people living far by  |
| 1) usually girls washrooms on the floor are unclean<br>2) ventilation issues in the classroom<br>3)bad quality benches  |
| No suggestions everything is good   |

***List of students given feedback in  
Academic Year 2022-23***

### List of students given feedback in Academic Year 2022-23

| Sr. No | Name of the Student        | Roll Number | Gender | Year of Admission | Branch | Current Semester |
|--------|----------------------------|-------------|--------|-------------------|--------|------------------|
| 1      | PURVITA DHAKAD             | 1021168     | Female | 2022              | COMP   | 4                |
| 2      | DHARPAWAR HARSH            | 1021130     | Male   | 2021              | COMP   | 4                |
